i live in oklahoma and your conditions for the merger of the the two cell phone companies stink to high hell. i've been a satisfied att wireless customer with the same number and plan since 1995. why should they have to divest themselves of their **customers**??? we chose att through free will, as most people choose their plans. i've had plenty of opportunity to change, but saw no reason to.

thanks for nothing and looking out for the average american consumer.
